If you're looking for an easy way to find the best free software for programming, then look no further than this list. We've tried and vetted all of these programs, so that you don't have to spend hours researching which ones to try. This blog post is perfect for those who are just learning how to code and want a place to start — we'll teach you about each one and also tell you what they can be used for. These articles and tools will help you to learn how to code and take the first step in solving creative problems. Introduction: Building Better websites, Apps and games with App Inventor and Codea (official site) (official site) Geolocation: GPS tracking (how to use it in your app).

(available in HTML5 Canvas, many devices .) or [C++], [HTML5 or Java], [Python], [JavaScript] (popular among beginners). WebGL is a JavaScript API that allows high-performance 2D/3D graphics in web browsers without plugins. WebGL is an open industry standard developed by the Khronos Group and to which all major browser vendors contribute. WebGL enables advanced 3D and 2D graphics capabilities for visually stunning web applications across desktop and mobile browsers. It is designed from the ground up to be fast and efficient with today's hardware and modern web APIs, such as Web Workers, XMLHttpRequest, Canvas to provide a smooth, responsive user experience. The APIs are minimal enough to not get in your way as a developer but powerful enough to create high-end 3D games and graphics applications. WebGL is free and works on Windows, Mac, Linux and the Web. If you ever find something to be missing in the api, feel free to send a message to Khronos asking for it. WebAudio API is an experimental JavaScript API for processing and synthesizing audio in web applications. It provides an API for playing audio as well as capturing audio from the device microphone and generating audio via the device speakers. It is currently supported in Google Chrome and can be enabled by navigating to chrome:flags and enabling "experimental Web Platform features". The Web Audio Editor demo allows you to view your browser's current AudioNode tree. WebGL 3D Graphics Library - WebGL3D is the open standard 3D graphics API that will be available in all major browsers. It gives JavaScript developers access to the 3D scene graph, context-based scene management, programmable shaders, multithreaded stereo rendering and hardware accelerated surfaces.

Online courses

Free online programming tutorials - offered by freeCodeCamp and Code along Magazine. Many of these courses are intended for beginners. FreeCodeCamp has a goal to help marginalized groups gain computer science skills and is a project of the non-profit organization Idle No More.
